

GEP

**IS AN AWESOME
PLACE TO BE AN
ENGINEER**

< GLOBAL TECHNOLOGY POWERHOUSE >

GEP is a leading global provider of procurement and supply chain technology to Fortune 500 and Global 2000 enterprises worldwide.

Intelligent, intuitive software from GEP is helping procurement and supply chain organizations at market-leading enterprises across the globe boost productivity and performance, slash turnaround times and increase savings.

< PIONEER IN CLOUD, TOUCH

AND MOBILE TECHNOLOGIES >

GEP is one of the fastest-growing technology companies in the world and a pioneer in cloud-based business and productivity solutions for blue-chip enterprises across the world.

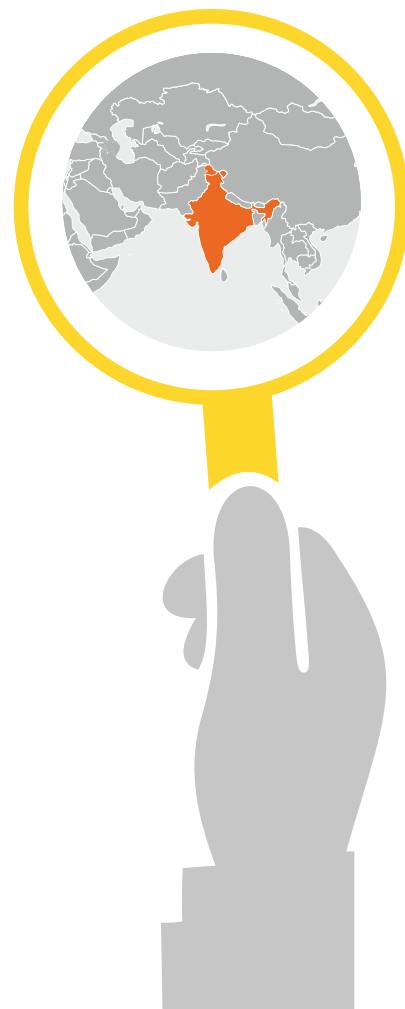

< WORLD-CLASS SOFTWARE

MADE IN INDIA >

GEP is one of the few software companies focused on end-to-end product design and development in India. We leverage some of the most brilliant product innovators in the country through the full product life cycle to develop trailblazing business and productivity solutions that are used by world's leading enterprises, such as Google, Honda, Kellogg, DuPont, Maersk, Standard Chartered Bank, among others.

GEP SMART is a true suite, encompassing spend analysis, sourcing, contract management, P2P and supplier management. Unlike other self-proclaimed procurement “suites” in the market that have one powerhouse module and only the most basic of capabilities in other modules, GEP's solution possesses extremely strong capabilities in each of these modules. – **Andrew Bartolini, CPO Rising**

< HOTBED OF NEW TECHNOLOGIES >

First movers, early adopters – our engineers have a strong affinity toward new, emerging technologies and are always eager to try new platforms and frameworks. So when everyone else was talking about the benefits of cloud economics, we went ahead and developed the industry's first cloud-based sourcing and procurement platform – **GEP SMART**.

Getting to work on state-of-the-art technologies on the job makes me feel great at the end of each day. There's always something new to explore. – **Huzaifa Matawala**

< THE PLACE TO INCUBATE NEW IDEAS >

At GEP, no idea is too small to try or too big to execute. So anything and everything that solves our clients' problems is a good idea. And if it's a great one, it jumps the queue to go straight into execution. From concept to production in a matter of weeks – it's nothing unusual at GEP.

< CONSUMERIZED TECHNOLOGY >

Our product design philosophy is centered on providing a “consumerized” user experience to our clients. Simple, intuitive tools that are based on cutting-edge design and usability standards to revolutionize what users expect from the business application experience.

“
The product name, GEP SMART sums up its approach: using software to help customers’ employees make better, faster buying decisions. GEP is a good option for large multinationals that want intelligent procurement software for both upstream and downstream, in a single, cost-effective ePurchasing suite. – [Forrester Research](#)
”

< CULTURE >

GEP is a collective of talented, creative problem solvers with diverse backgrounds. And to let our people be themselves and work to their strengths, we've nurtured a workplace that's transparent, flexible and uncommonly free of rigid bureaucracy.

So they dare to risk, pursue unconventional ideas, work on new challenges, and think of better and more effective solutions to our clients' problems.

I knew that GEP is the place for me when my idea was fast-tracked to production and deployed at the client's site in a matter of few weeks. Where else do you get this opportunity? – Priti Dawda

An illustration showing a person running inside a stylized flower shape, which is displayed on a laptop, a desktop monitor, a tablet, and a smartphone. The background is orange with a dotted pattern.

< NEVER A DULL

DAY AT WORK >

Our passionate and creative bunch of engineers are always game for new challenges. So when they aren't competing with each other in ping pong, trekking in the Himalayas, or running a marathon, they are working on developing simple, innovative solutions to some of the most complex problems that face our clients.

< NO LADDERS HERE >

Because you won't need one. We like to keep things simple yet effective — just like the software we develop. So we don't have a maze of designations and levels to get things done. We empower our people to chart their own path to success through meritocracy. Take the elevator instead, we say.

“

GEP is known for strong expertise in strategic sourcing and category management. It has built up significant technology capabilities in-house — GEP SMART is a one of its kind S2P platform, cloud-hosted and mobility enabled. – Everest Group
