⊙GEP|CLICK™

The Intuitive, User-First Cloud Integration Platform.

There is a paradox in modern business technology. Rapid evolution in the supply chain and procurement space necessitate integrating next-generation technology to leverage competitive advantage with legacy systems. Yet, integration is often a complex and time-intensive task that requires the cooperation of IT teams, third-party system specialists and custom development that negate the goals of speed-to-market. There is rarely an integration process that doesn't involve the ad hoc costs associated with upscaling technology infrastructure and resources.

GEP CLICK™ is a next-gen integrator unifying GEP's procurement and supply chain solutions with clients' ERP/CRM systems in just a few clicks.

⊙GEP|SOFTWARE

THE LOW CODE /
NO CODE PLATFORM

Let's face it: ERPs and other key legacy software are an investment that the enterprise continues to rely on for critical functions. The rise of cloud technologies have enhanced, not replaced, ERPs as foundational pillars. The problem is that integrating with them is always complex. Not anymore. GEP CLICK is built for business users. Connect to any software application, CRM or legacy system and integrate multiple ERPs – including SAP and Oracle – to unlock the full potential of supply chain and procurement technology without needing specialized IT consultants or coding knowledge.

GEP CLICK is designed for procurement and supply chain pros who need to increase productivity, improve planning efforts and accelerate implementation cycles.

Powered by Microsoft Azure, GEP CLICK takes the pain out of integration projects. Easily integrate your legacy systems with GEP's cutting-edge software. Cut the time and cost out of integration. Deploy components at your own pace and enjoy a unified experience across on-premises or cloud solutions, on any system, anywhere in the world without any disruptive upscaling or infrastructure replacement.

POWER ALL YOUR
BUSINESS PROCESSES

Beyond GEP's software solutions, GEP CLICK can help your enterprise extend integrations, providing support and enabling expansion across all your unique business process, all in one place. With GEP CLICK's out of the box pre-built integration content, you can discover and unify all the necessary components for integrating on-premise or cloud applications with various GEP solutions. GEP CLICK empowers you to view and access GEP software APIs to explore, discover, test and consume all the APIs available in the GEP cloud ecosystem.

KEY FEATURES

- Simple and self-service enabled user experience
- Built for the cloud and powered by Microsoft Azure
- Native proprietary artificial intelligence and machine-learning technology, GEP MINERVA™
- Microsoft One Cloud security and compliance
- Hosting, upgrades, maintenance and uptime warranty from GEP
- No specialized IT teams required, built for business integrators
- Multiple deployment options featuring pre-packaged integrations

ADVANCED CAPABILITIES:

- Single cloud integration for all GEP software
- Deploy heterogenous landscapes on a single cloud with central API management
- Out-of-the-box integrations for on-premise ERPs and other cloud solutions
- Simplified, self-service business process integrations (BYOI)
- Direct integration with global suppliers
- Predictive insights and monitoring for end-to-end visibility
- Build mobile and digital experiences by testing, releasing, and monitoring customized apps

SELF-SERVICE: SIMPLIFIED INTEGRATION FOR BUSINESS USERS

Make your enterprise faster and more agile with GEP CLICK, designed to be a self-service platform that makes the integration experience easy to understand and easier to use. Configure the integration with intuitive drag-and-drop tools that will allow you to be ready to go in just a few clicks. No longer find yourself dependent on your enterprise's IT organization or even on GEP's technical resources.

Deliver hardware and software savings thanks to the cloud-native platform that doesn't need your existing technology infrastructure to be replaced or upgraded. Enable your IT team to run lean and focus on more mission critical projects as integration is no longer their concern. GEP has it under control.
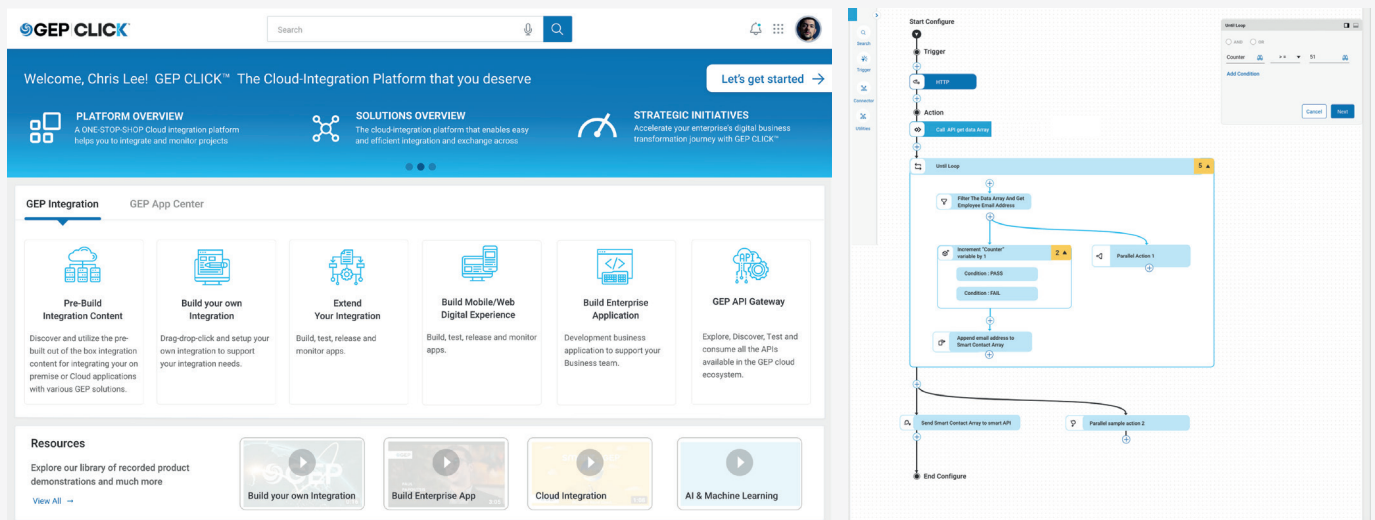

BUILT FOR USERS, FUTURE-PROOFED FOR EVERYONE

GEP CLICK follows a user-first software philosophy that focuses on intuitive designs and user experiences with easy-to-use interfaces and dashboards. GEP CLICK offers multiple deployment options that enable you to:

- Integrate ERP solutions such as SAP, S/4 HANA and MDG-S on one cloud-native platform

- Integrate across heterogeneous landscapes using hybrid integrations

- Deploy API to API integration using middleware to create a unified landscape

GEP CLICK is the cloud integration platform that allows enterprises to integrate their ERP, CRM and legacy systems into a single digital solution that slashes the cost of integration and reduces implementation time. GEP CLICK's cloud integration platform as a service (iPaaS) enables companies to:

- Cut multi-system integration projects from months to weeks or days

- Minimize IT support for implementation

- Reduce reliance on costly third-party resources and consultants for integration work

- Ensure end-to-end data integrity from sales through sourcing, purchasing, inventory management to invoicing
